Fluorinated Coatings and Finishes Handbook

CONTENTS:

1. Fundamentals
2. Producing Monomers, Polymers and Fluoropolymer Finishing
3. Introductory Fluoropolymer Coating Formulations
4. Binders
5. Pigments, Fillers and Extenders
6. Solvent Systems
7. Additives
8. Substrate and Substrate Preparation
9. Liquid Formulations
10. Application of Liquid Coatings
11. Powder Coating Fluoropolymers
12. Fluoropolymer Coating Processing Technology
13. Measurement of Coating Performance
14. Recognizing, Understanding and Dealing with Coating Defects
15. Commercial Applications and Uses
16. Health and Safety

Appendices
Trade Names
