

The Effect of Temperature and Other Factors on Plastics

CONTENTS:

- Properties as Functions of Temperature
 - Flexural Modulus/Strength
 - Tensile Modulus/Strength
 - Shear Modulus/Strength
 - Impact Strength
 - Hardness
 - Torsional Modulus
 - Coefficient of Thermal Expansion
 - Dielectric Constant
 - Dissipation Factor
 - Water Absorption
 - Specific Volume/Heat
- Stress vs. Strain Curves at Various Temperatures
 - Strain Rates
 - Humidity Levels
- Mechanical Properties vs.
 - Strain Rate
 - Humidity Level
- Electrical Properties vs.
 - Humidity Level
 - Frequency
- Also Included
 - Properties vs. Thickness
 - Dimensions vs. Moisture
 - Properties vs. Glass Content
- Data Presented As
 - Graphs (Multipoint)
 - Tabular Data
 - Trade Name Index
 - Complete Metadata
